SEMINARIO KLARIZZE ANNE M. PUZON
Jueves, 18 de febrero de 2016

Title: Natural resource dependence and the endogenous timing of institutional change

Summary: By proposing a novel, two-stage dynamic game of resource extraction, this presentation focuses on three questions:

- 1) How do political actors in oil-dependent economies behave when there is a threat of institutional change?
- 2) Do transfers always delay the timing of conflict?
- 3) Does over-extraction of resources always happen?
